

**NEW!**

## AC/DC power supplies TESAV1000 series

### Features

- Class: Industrial
- **Case operating temperature range:  $-60^{\circ}\text{C} \dots +125^{\circ}\text{C}$**
- **Low profile 16 mm design**
- Cases with mounting flanges; or copper case (optional)
- Parallel operation
- Feedback from load
- Output current up to 40 A, output power 1000 W; one output channel
- Input voltage ranges: 176...242 VAC; 80...140 VAC
- Power density up to **3382 W/dm<sup>3</sup>**
- Magnetic feedback without optocouplers
- Output voltage adjustment, remote on/off
- Max capacitance 3100  $\mu\text{F}$  for  $U_{\text{out}}=27 \text{ VDC}$

### Description

**Ultra-compact isolated AC/DC converters** are especially designed for industrial applications and harsh environment operation. These compact units (168 x 110 x 16 mm) have output power up to 1000 W and operating temperature range between  $-60 \dots +125^{\circ}\text{C}$ . The absence of optocouplers in the converter's circuit empowers safeness during unit's entire lifetime even when performing in conditions of ionizing radiations and at high temperature. These modules have full protection complex against over current, shorting and overheating, can be switched on/off by a signal and be connected in parallel or in series.

These modules are built using especially designed electronic components and sealed with heat-conducting potting material. They have wide operating temperature range and thermal protection chip. These modules undergo special thermal and limit tests, including burn-in-tests with extreme on/off modes. They are available in metal cases with mounting flanges.

Upon customers' request this module can be produced in copper cases (covered by "Black chrome"), allowing its installation on aluminum heat sink and providing a positive effect on the modules EMC and heat transfer.

Upon customers request a low-cost version of a module is available.

## Ordering information

### TESAV 1000 - 230 S 24 - U T B

1            2            3 4 5        6 7 8

- 1 - «TESAV» Series
- 2 - Max output power, W
- 3 - Input voltages
  - 230 – 230 VAC (176...242 VAC)
  - 115 – 115 VAC (80...140 VAC)
- 4 - Index of output channels quantity
  - S – one
- 5 - Nominal output voltage, VDC (two signs for a channel)
- 6 - Index of case design
  - U – metal case with flanges
- 7 - Index of operating temperature range of the case
  - T –60°C...+125°C
- 8 - Index of low cost version
  - B – Low cost version (customer-considered simplified construction)

## Technical information

### Standard models with one output

Module	Input voltage range	Output power	Output voltage / nominal output current	Typical efficiency
TESAV1000-115S24-UT	80...140 VAC	960 W	24 VDC / 40 A	89%
TESAV1000-115S27-UT	80...140 VAC	1000 W	27 VDC / 37 A	89%
TESAV1000-115S48-UT	80...140 VAC	1000 W	48 VDC / 20,8 A	91%
TESAV1000-230S24-UT	176...242 VAC	960 W	24 VDC / 40 A	90%
TESAV1000-230S27-UT	176...242 VAC	1000 W	27 VDC / 37 A	90%
TESAV1000-230S48-UT	176...242 VAC	1000 W	48 VDC / 20,8 A	92%

Modules with non-standard output voltage from 3 to 80 VDC with maximal output current up to 40 A, could be delivered by request.

<sup>1</sup> - Typical efficiency are stated for module which were set to an aluminum test heatsink (400x400x8mm) through a heat-conducting paste

## Specifications for AC/DC power supplies TESAV1000\*

<b>Input specifications</b>	
Input voltage range / transitional deviation, 1 sec 115	~80...140 VAC/~80...140 VAC
Input voltage range / transitional deviation, 1 sec 230	~176...242 VAC/~176...264 VAC
Input frequency	47...440 Hz
Input filter	absent
<b>Output specifications</b>	
Output voltage adjustment (single-channel models only)	±5% Uout
Instability of output voltage in accordance to changing of output current from 10 to 100% for single output model	±2%
Instability of output voltage in accordance to instability of input voltage	±0,5%
Ripple and noise (peak-to-peak) (20 MHz)	<2% Uout
Short circuit protection**	>150% Iout nom, auto repair
Overvoltage protection**	<130 % Uout
Over current protection level**	Pout ... 1.3·Pout
Remote On/Off	Shuts down outputs by applying 0...1,1 VDC or connection of output «ON» and «- IN», I≤5mA
The maximum output power without the heatsink, Tamb=50°C	250 W
<b>General specifications</b>	
Case temperature (operating)	-60°C ...+125°C
Case temperature (storage)	-60°C ...+125°C
Case temperature power decrease (natural convection)	See diagram (dashed, dash-dotted curve)
Case temperature without power decrease with heat sink	See diagram (solid curve)
High humidity	100% @35 °C
Thermal resistance case — environment without heat sink	2,7 °C/W
Insulation voltage input/output	~3000 VAC
Insulation voltage input/case	~1500 VAC
Insulation voltage output/case	=500 VDC
Isolation resistance @ 500 VDC	>20 MOhm
EMC standards	EN 55022, class A with additional filter
Safety standard	IEC/ EN 60950
Typical MTBF (Tcase = 50°C; Pout = 0,7 Pout max)	50000 hrs
Cooling metod	Free air convection or forced air cooling
Weight (max)	500 g

\* All specifications are valid for normal climatic conditions, Uin.nom., Iout.nom., unless otherwise stated.

\*\* Parameters are stated for the information purposes and could not be used at long term work, exciding maximum output current, at work outside of a range of working temperatures, at module's work with the output voltage over a range of adjustment.

## Output power vs an ambient temperature at input voltage ~176...242 VAC (copper case)

Dropping parts of the dashed and dash-dotted curves are in accordance with the **maximum temperature of the case**. Output power must not exceed the values which are limited by corresponding curve for a given ambient temperature.

Modules can be used without a heat sink only when screwing them heat conductive plate with thermal paste and with the length and width not less than case size and thickness of not less than 4 mm.

At point ▲ simultaneously present several extreme worst-case conditions, such as the combination of maximum case temperature and maximum output power. Continuous module operation at these points should be avoided.

### Typical connection diagram

C1	1uF 275VAC, X2 class
C2, C3	2200pF 250VAC, Y2 class
C4	820uF 400V
C5	Tantalum, Low ESR
R1	470kOhm 0.5W
Rt1	NTC 2.5Ohm 15A
FU1	25A 250V

## Pin out

Nº Pin	1	2, 3, 18	4, 5, 19	6	7	8	9, 10, 11	12, 13, 14	15	16	17	20	21
Single output	ON	-IN	+IN	CASE	DIAG	+RS	+OUT	-OUT	-RS	ADJ	PARAL	L	N

## Single output model with flanges (VIII case size)

## Certificates

Certificate ISO\*  
CE conformity declaration

\*Management system of Alexander Electric is ISO certified

## Note

The label with sign "remove before use" can be placed on the top surface of the module and must be removed before installation.
